Laundromat system WashPay 4.0

WashPay 4.0 "Next step" – model 2015. New product on market of laundromats.

Description: significantly improved terminal for laundromats. We have used the latest electronic components and technologies. It has a lot number of advantages and options.

WashPay 4.0 includes:

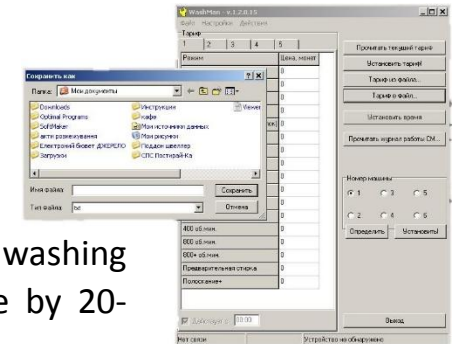

1. Central terminal: bill acceptor, coin acceptor, gprs-modem, card reader, LCD display, wireless connect (2400 MHz, ZigBee), Bluetooth.

To central terminal can connect:

- Dispenser of liquid detergent
- Dispenser of cards
- Server application for telemetry
- Server application for cards reception

2. Access Control Module – board, which installed in each washing machine or dryer and connect with electronic module of device by 20-contacts wire.

3. Service Manager – support PC software for setting and statistics.

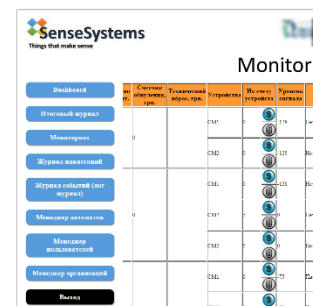

4. Server – server for online monitoring, remote control, remote upgrade software, accounting and other.

5. Card`s database – it allows to set discounts to cards, accounts sales of cards, connect with payment systems, to manage dispenser of cards.

Our works: conception, schematic design, pcb layout, pcb documentation, ordered a pilot batch, testing of prototypes and error correction, producing.

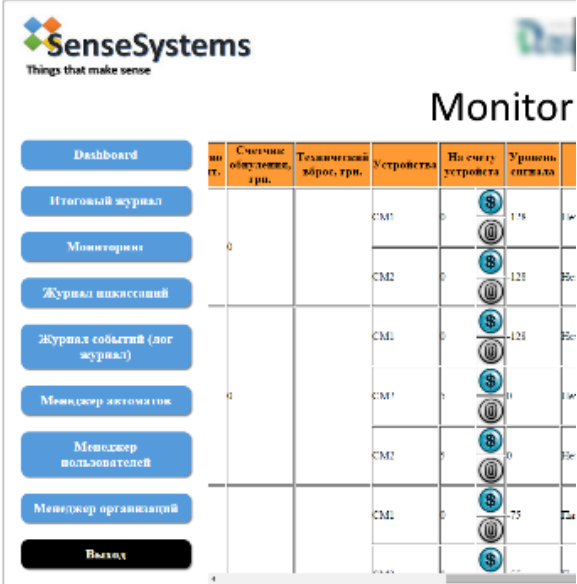

Works well till today!
